8+ PROJECTS

12+ MONTHS INTERNING

150+ LEETCODE SOLVED

A AISHWARYA SINGH

WHO I AM

About *Me*

A technologist who believes the best software is built at the intersection of technical rigour and genuine empathy for the end user.

A AISHWARYA SINGH

My work spans the full stack — FastAPI backends, React interfaces, mobile applications in Flutter, and data pipelines feeding into Power BI dashboards. I'm comfortable in whichever layer the problem lives in.

Outside the IDE, I'm a creative writer, a TEDx performer, and a competitive programmer. I believe that a wide range of influences — literature, data, performance — makes better engineers.

PROJECTS BUILT	8+
MONTHS OF INTERNSHIP	12+
